How do you live, knowing the date you will die? In a near dystopian future, Artificial Intelligence uncovers the clockwork nature of the universe, capable of revealing the date each person will die. But when Scott Beck is told his given date of 22nd April is wrong, he sets off on a journey that explores the true nature of free will, morality, and sacrifice. Combining dystopian, post-apocalyptic, and cyberpunk fiction, *The Warm Machine* is the first novel in the haunting five-part *Humanity Series*, depicting a future in which humanity is on the brink of

annihilation. What Readers Are Saying... "A smashingly original concept on the whole dystopian trope." "What a thrilling read, had me gripped from the start." "A fast-paced action-packed thriller of a read set in a dystopian near-future." "This book raises some big questions about where technology is headed and can we maintain control? And are the choices we make made for us? A gripping read from a new dystopian voice." "The mix of science fiction and religion worked well to create a captivating read." "Rain builds a body of evidence on all sides, carefully ramping up the tension as well as fleshing out his characters - you're never quite sure who has right on their side - until.. well, you'll have to read the book."

We Found Paradise. Now What? Student Paul Kostakis has caught the attention of Ludo, an Artificial Intelligence obsessed with games and stories. In return for a few little favors, she's offering "brain uploading". She can fatally dice your brain, scan it, and recreate you in a virtual-reality heaven she controls. You can do anything in there: become a griffin, upgrade your mind, fall in love, or go mad. When Paul accepts Ludo's offer, sooner than he would've liked, he learns that people can find real problems even in a digital world. One of them is that Ludo has powerful opponents who want to shut her down, bring death to her immortal people, and end her game forever.

The Terran Alliance looks to the horizon as they explore the far reaches of the galaxy! The Korvil have attacked Earth, setting into motion a full-scale war that humans have little hope of surviving on their own. In the heat of

battle, the Shiravans come to their rescue, turning the tide of the enemy invasion. This forms a tentative peace between the two races, but there are many more steps before reaching a full alliance. The aftermath of the attack on Earth leaves millions dead and mixed emotions between the earthbound nations and the spacefaring Alliance. Tensions rise as governments try to infiltrate the organization in order to gain an upper hand in world politics; however, the Alliance has bigger fish to fry as they learn more about their new enemy--the Korvil. Like something from a science fiction book, the massive, bear-like creatures know nothing of peace or mercy, only of power and war. They will stop at nothing until they are the alpha race of the galaxy no matter who they have to kill--even their own. As the war continues, Kitty Hawk, Herald of the Terran Alliance, accompanies a few ships to the Shiravan homeworld in hopes of cementing their partnership to defeat this threat. As she reaches the alien world, she realizes there is more than meets the eye with this peaceful race. Will the leader of the Alliance be able to come to terms with the Matriarch, or will humans now face two powerful threats instead of one? On the other side of paradise, a nightmare waits... After caring for his mother in her last days, Alex has gone off round the world - with no plan other than to travel and maybe recapture some of his lost youth. Beginning his travels in Indonesia, the idea of finding himself sounds appealing...but soon, he finds himself in real trouble. It starts with a bus crash on a terrifying mountain road. Lucky to escape with his life, Alex loses everything else - even his identity. But then he meets Domino, a beautiful

girl who takes Alex under her wing. At first it's an intoxicating adventure, but Alex starts to realise that danger seems to follow her around. As they approach the magnificent Lake Toba, and head to the remote community of free spirits that Domino calls home, it seems there's trouble in paradise. The ideals of the camp seem honourable - a simple life, shared by friends in a beautiful place hidden from the world. But Domino has no answers for the questions that are forming in Alex's mind: Why do the local villagers hate them so much? Why are people leaving the camp in the dead of night? And what are the strange shapes lurking just beyond the clearing? A taut, atmospheric and emotive thriller, DARK HORIZONS transports you to the lush landscapes of Sumatra, and the twisted ideals and deadly secrets lying in wait there...

First in the USA-Today bestselling PACIFIC HORIZONS series! In these interconnected romantic novels, characters facing tragedy, heartbreak, and painful family secrets are drawn to the wild beauty of the natural world. Breaching whales and howling wolves refresh their spirits, but only human love can heal their souls. Haley knew that carrying her twin sister's baby would be a sacrifice. She just didn't know how great. Pregnant, overworked, and driven to the end of her rope by the neediness of the sister and widowed mother who depend on her, a high-powered young attorney seeks refuge with a week's vacation on the Alaskan coast. As overachiever Haley soaks up the serenity of her unexpectedly agreeable surroundings, she finds something else she doesn't expect -- deep feelings for

the wildlife-loving boat captain who reminds her how to laugh. With her unborn niece or nephew on the way and thousands of miles of ocean between their lives and careers, Haley and Ben settle for a friendship. But back home in California, the emptiness in Haley's heart begins to fester. When her pregnancy takes a frightening turn, she must examine what really matters -- and rediscover the childhood dream she never realized she had lost. Praise for romantic fiction by Edie Claire: LONG TIME COMING "Emotionally gripping, suspenseful and superb... I was held in wonderment over much of this story and realized early on to expect the unexpected. This is a story of trust, love, friendship and healing. Ms. Claire is an author I hope to see more of in the future. If Long Time Coming is any indication of her writing talent, I will be first in line at the bookstores to get more of her work. This is a positively splendid tale from start to finish and is highly recommended." Reviewer's Choice Award -- Road to Romance "Two words. ABSOLUTELY FANTASTIC! Edie Claire has written a wonderful novel about friendship, love, guilt and death... Utterly riveting." Rating: 10/10 -- Contemporary Romance Writers MEANT TO BE "One of the best books I have read this year... An element of suspense runs through the pages, and the endearing tale builds to a crescendo of excitement and thrill while warming the heart. Meant To Be is a powerful story of love, healing, discovery and truth... I closed the covers wishing I could stay inside the green world of Meara and Fletcher's mountain. Ms. Claire has woven a tale that touched my soul and will live as a cherished keeper to read again and again. I am pleased to award

Is it braver to trust your enemy, or to stand alone? She didn't mean to escape from Boundary. Yet, somehow, she did. Now, thrust into an unfamiliar and dangerous world, the young woman written off as a weak link must untangle the mystery of her past and find a way to rescue those still trapped within Boundary, while battling her own doubts and troubled past. But time is quickly running out and she has two choices: put her trust in an old enemy, or find herself completely alone...both are equally terrifying. Barrier is the second book in The Other Horizons Trilogy by teenage author Mary Victoria Johnson. The first, Boundary, is also available from Lodestone Books.

The time when the twelve suns become one is drawing closer and it could mark the end of all things. Only Chess Tuesday can prevent destruction - or make it happen. She has a choice to make, but there are powerful forces trying to influence her decision and Chess isn't sure who the enemy is any more. Is it Splinter, who betrayed her, and who is now falling for ever through time and space? Or could he hold the key to everyone's salvation?

GRACE ON THE HORIZON is the second full-length novel in The White Sails Series. Grace and Seamus, united by their past experiences, are adrift on a raft of shame in the sea of 1830s London society. After a personal tragedy, Grace's

desperation to leave London forces Seamus to accept a dubious commission on the private explorer, Clover. With the expedition financed by Colonel Hamilton and his private backers, Seamus is tasked with mapping a round-the-world voyage. But Colonel Hamilton has an additional package that requires delivering—Father Babcock—a priest wanted for murder. The church wants Babcock transported far from England to set up a new mission in South America. Battling his overprotectiveness, Seamus breaks his oath to always tell Grace the truth and hides Babcock's identity from her. But the journey aboard the Clover is far from smooth sailing, and Grace suspects a saboteur. Trapped within the ship's confines, she must learn to forgive her husband's well-intentioned duplicity and determine who wishes them harm—because now she also has her unborn child to protect. Is it an aggrieved member of the Admiralty who believes Seamus disgraced the service by resigning his command to chase after Grace? Perhaps Grace's father, Lord Flint, seeking revenge against her for ruining the family name? Or a jealous suitor determined to ruin the life Grace is trying to build with Seamus? From the damp cobbled streets of London, around the freezing stormy tip of Cape Horn, and into the scorching dusty bush of New Holland, GRACE ON THE HORIZON promises another adventure on the high seas, bursting with action and suspense. It is historical women's fiction that will appeal to fans of the strong female protagonist in *Outlander* and *Poldark*.

beyond the wasteland of Old Seattle lies a gleaming new city where thousands are desperate for a cure. To put an end to the Waste—and bring justice to those responsible—Kobi and his new friends will have to return to the heart of Old Seattle, where the outbreak began. It's a dangerous journey. But Kobi knows what lies ahead. And he's ready to fight. Nail-biting suspense and nonstop thrills make this action-packed adventure perfect for young readers who love survival adventures like Gary Paulsen's *Hatchet* or dystopian series like Jeanne DuPrau's *City of Ember*.

Since the Turks first shattered the glory of the French crusaders in 1396, the Ottoman Empire has exerted a long, strong pull on Western minds. For six hundred years, the Empire swelled and declined. Islamic, martial, civilized, and tolerant, in three centuries it advanced from the dusty foothills of Anatolia to rule on the Danube and the Nile; at the Empire's height, Indian rajahs and the kings of France beseeched its aid. For the next three hundred years the Empire seemed ready to collapse, a prodigy of survival and decay. Early in the twentieth century it fell. In this dazzling evocation of its power, Jason Goodwin explores how the Ottomans rose and how, against all odds, they lingered on. In the process he unfolds a sequence of mysteries, triumphs, treasures, and terrors unknown to most American readers. This was a place where pillows spoke and birds were fed in the snow; where time itself unfolded at a different rate and clocks were banned; where sounds were different, and even the hyacinths too strong to sniff. Dramatic and passionate, comic and gruesome, *Lords of the Horizons* is a history, a travel book, and a vision of a lost world all in one.

This edited volume provides managers, as well as students, with the best practices in effectively leading the 21st century workforce and managing change. It applies positive principles arising from the newly emerging fields of positive psychology,

positive change, and positive organizational studies to the field of leadership and change; offering managers strategies and tools to lead change effectively, in the present-day boundary-less work environment. At its most fundamental level, the uniqueness of this volume lies in its anchorage in the moral and spiritual dimension of leadership, an approach most relevant for contemporary organizations.

Globalization has proliferated business with numerous challenges and opportunities, and simultaneously at other end the growth in economy, population, income and standard of living has redefined the scope of business and thus the business houses approaches. A highly competitive environment, knowledgeable consumers and quicker pace of technology are keeping business enterprises to be on their toes. Today management and its concepts have become key for survival of any business entity. The unique cultural characteristics, tradition and dynamics of consumer, demand an innovative management strategy to achieve success. Effective Management has become an increasingly vital ingredient for business success and it profoundly affects our day-to-day life. Today, the role of a business houses has changed from merely selling products and services to transforming lives and nurturing lifestyles. The Indian business is changing and so do the management strategies. These changing scenarios in the context of globalization will bestow ample issues, prospects and challenges which need to be explored. The practitioners, academicians and researchers need to meticulously review these aspects and acquaint them with knowledge to sustain in such scenarios. Thus, these changing scenarios emphasize the need of a broad-based research in the field of management also reflecting in management education. This book is an attempt in that direction. I sincerely hope that this book will provide insights into the subject to faculty members, researchers and

students from the management institutes, consultants, practicing managers from industry and government officers. Do you sometimes feel bogged down or held back by unhelpful thinking patterns and low moods? In other words: are you human? Do you have worries, regrets, and fears? Do frustrations, insecurities, or resentments get in the way of doing, feeling, and being your best self? Do you occasionally wanna curl up in a fetal ball hooked up to an IV drip of chocolate and Netflix, or punch the whole, wide, world in the face? No? Just me, then? Chaotic thinking and feeling are common internal struggles, and I think most people encounter variations of this problem in some way or another. Unhelpful negativity has a pesky way of preventing us from feeling good and doing what we want to do. It's kind of like a gallon of bird-poop smeared across the windshield of life... The "horizon of healthy thinking" concept is a clear, simple-to-use, transformative therapeutic exercise. This user-friendly process can be applied when you're feeling down, and gently move you to a place of practical engagement with reality. The third phase leads you to a mentality of tranquility, possibility and empowerment. You do all this by harnessing the underrated power of your very own thoughts. This new, enhanced mindset is called: "above the horizon" and it's where our awesomest inner selves reside. It's what makes us most conducive to happiness, growth, fulfillment and good hair days. If you know how great you feel when you're in that headspace, the tools in this book can help you do more of that, on demand. And even if it's been awhile since you last felt good, this powerful technique can help you ease yourself out of that rut, address your reality from an honest perspective, and then set you on track to becoming more like the "you" that you want to be.

A time jump. A fight for survival. A bond between species. It wasn't possible, but then it happened... A Neanderthal's

47,000-year-old remains are found in Spain. That's not unusual, but positioned beside the woman's skeleton is something that shouldn't be there—a robotic drone. Lincoln Woodhouse has some explaining to do. When confronted with the evidence, Lincoln cannot deny that the drone is one of his own models. After all, he routinely jumps his drones into the past to collect environmental data. The problem is, this drone shouldn't even exist in Lincoln's universe. Everyone knows sending a drone into the past creates an alternate timeline. The implications of the discovery are staggering, and Lincoln is ordered to jump back in time to investigate, even though no human has ever done so before. Upon jumping, he and his team find themselves in a world of deadly creatures and savage beings. Amidst the primeval chaos, Lincoln encounters Skyra, a woman unlike anyone he has ever known. She is a skilled hunter and vicious fighter. She is not human, but she just might hold the key to humanity's future. *Obsolete Theorem*, the first book in the new *Across Horizons* series, is perfect for readers who love time travel, deadly creatures, wilderness survival, and unforgettable characters. Excessive costs, cumbersome processes, disincentives and what's more: all manner of isolated, self-serving sector solutions. A financial system with methods and processes from yesteryear shapes our banking. Indeed, our entire life and society—especially the state and administrative bodies—are based on such archaic processes. In addition, billions of people worldwide are excluded from the financial system as they are not even in possession of a bank account. Banks, currencies, payment methods and administrative transactions are, on the whole, not sustainable. They are responding neither to the needs of many customers/citizens, nor to the challenges of the times. Politically and socially, we are drifting about aimlessly, lacking control and efficiency. Financial expert and entrepreneur Yasin Sebastian Qureshi—at age 29 the youngest person ever licensed to run a European bank—describes groundbreaking solutions that have long been in existence: digitalisation and its offspring the Internet, mobile phones and blockchain which are actively determining progressive developments, and whose most radical embodiment so far has been the rise of Bitcoin and other cryptocurrencies. The revolutionary thing about blockchain, however, is not the mere payment

process, but the underlying technology, the more efficient processes and, in particular, its decentralised character and interconnectedness. Together with Benjamin Bilski (Forbes "30 under 30"), Qureshi outlines the future of finance and all the relevant administrative processes in business and state, even entire states, on the basis of such blockchains. The authors also dissect the history, meaning and nature of money; it has always been in a state of transformation—but now is in one of complete upheaval. The two also shed light on the social, economic and political consequences of these mutations. But what will happen if everything is organised into blockchains? The answer is certainly not one that should be feared. The new foundations of our daily and working existence are unleashing forces that have so far been pointlessly and inefficiently tied up in technocratic working environments. Following on from, and leaving behind, the Industrial Revolution, a new revolution is now on the rise. Starting in the financial system, it will turn everything there on its head and quickly expand to other areas. Blockchain is restoring time and its potential to all us—which we can use for other, better and more creative things. Cash, however, is likely to disappear in the medium term—as well as banks, at least as we know them today..

THE AGE OF NAPOLEON is the biography of an enigmatic and legendary personality as well as the

portrait of an entire age. J. Christopher Herold tells the fascinating story of the Napoleonic world in all its aspects -- political, cultural, military, commercial, and social. Napoleon's rise from common origins to enormous political and military power, as well as his ultimate defeat, influenced our modern age in thousands of ways, from the map of Europe to the metric system, from styles of dress and dictators to new conventions of personal behavior.

What happens when you find out your history is wrong? What happens when you find out your legends are true? Joshian Farstrid desired a simple life. He had his place on the ships, and a stable future. He had friends who trusted him, family who loved him, and a village who believed in him, and he wanted nothing more. His brother, Calian, desired the sea. He had his books, his maps, a promised spot on his father's ship, and now with his spear and the authority to go, his world was open. His own adventure was just beyond the horizon, and he was ready to write it himself. But when a young lord crashes offshore, and a race against time decides whether his life is forfeit or saved, they're plunged into a world they had been nothing but story. As the shadow returns across Learsi, they discover that the legends they drew inspiration from as children are actually history, their nightmares are the reality the world is about to face, and their heroes are not distant figments, but rather closer than they thought. Darkness returns, but Hope rises to meet it. The Fire is rekindled. Welcome to the world of Firebrand

weighing on her heart, she struggles to balance the two halves of her now very complicated life. And she soon realizes that history tests, or even stubborn vampire boyfriends are the least of her concerns. A mysterious shadow is descending upon Ruine and threatening not only the living but the dead as well. Lissie fears that the Kingsleys are on the wrong path. But with talk of a traitor amongst them, the Kingsleys' mistrust of Lissie grows and so do Connor's reservations. The list of people she can trust is growing smaller by the day. Now Lissie must have courage, follow her instincts and seek alliances from the most unlikely of places to prevent her home and her heart from falling into shadow. Lissie's life is now bound by the light and the dark... but can she save them both? In the end, she has always known that it will come down to a choice, and that no matter how hard she fights it, that choice will change her forever.

Often we feel stressed and frantic when traveling, whether on the daily commute, or the annual family vacation. But travel presents many opportunities that—with a mindful approach—can open our minds and hearts to new places and new experiences to enrich our existence. Often we focus on where we are going and how we are going to get there, but the questions this book poses are why we travel and how we can gain fulfillment by doing so. With inspirational quotes, practical travel tips, and Tiddy's own observations on travel, *The Little Book of Mindful Travel* is a stimulating read for a journey both in mind and body.

How can managers design and manage excellent customer experiences that will develop long-term relationships with their customers? This book addresses this key question and explores both the theory developed over the past 20 years and tools to create truly engaging brands. engagement, customer well-being and happiness, customer loyalty and emotions, the customer journey map, and big data and combines it into a practical and clear roadmap for brand managers. By integrating these modern perspectives, concepts, research techniques, and operative tools, this book provides a new perspective of marketing management to design and build engaging branding. Using extensive examples from a variety of industries, this book offers a global perspective that will appeal to both advanced students and experienced marketing managers.

Berlin, 1944Ariella Bannon is being hunted. Someone is determined to betray her, but she has survived against incredible odds, and the end is in sight. She will be reunited with her precious children, no matter what it takes. Meanwhile, Liesl and Erich have found a home in Ireland away from the chaos of war-ravaged Europe. As the dark news of what has happened to their fellow Jews filters through, they are torn - love for their mother and their home on one hand, and the profound sense of peace and belonging they have in Ballycreggan on the other. Like all of the other children who escaped Nazi territory on the Kindertransport, they must wait to hear the fate of their loved ones. For their foster parents, Elizabeth and Daniel, their dearest wish, that Ariella would survive the war, is also their deepest fear. Would her return mean the loss of the children they have come to think of as their own? As the Third Reich crumbles under relentless Allied bombs, Ariella is careful, but Berlin is a very dangerous place to be, and somebody knows she survived. Can she take one last enormous risk to be reunited with Liesl and Erich or will her betrayer see her finally captured? The Emerald Horizon is the long awaited sequel to the best-seller, The Star and the Shamrock.

Drawing upon research and practitioner narratives from management, leadership, organizational studies,

entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve economic and sustainable development. The authors take a holistic approach to ‘transforming knowledge’ that goes beyond the mere ‘application of knowledge’ to include the assimilation, adaptation, and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then presents success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in management is highlighted by bringing together academics, practitioners, policy-makers and interest groups from diverse regions and perspectives.

Three vast oceans, two young men and one dubious idea – to sail around the world. When a sailboat barely bigger than a bathtub pottered into the English Channel, James and Tom began the adventure of a lifetime. In their little boat Blue Eye they set sail, laden with the notion that happiness and freedom loitered just over the horizon. And yet as they journeyed between continents and across oceans, they found they were still anchored to their old unsatisfied selves.

Hampered not only by the storms of the Atlantic Ocean and the pirates of the Red Sea, the craving nature of the human mind also threatens their bid to circumnavigate the world. From the Caribbean to the Suez Canal, James and Tom chase one sunset after the next, convinced a treasure trove of fulfilment lies waiting beyond the horizon. What will it take for them to discover that the sea is not always bluer on the other side? Hooked on the Horizon is Tom Dymond’s travel memoir of sailing Blue Eye around the world. If you like being transported across oceans, escaping to far-flung paradises, and finding humour and philosophy in between, then you’ll love the story of Blue Eye’s adventure. Buy your copy of

PJ Manney concludes her visionary Philip K. Dick Award-nominated series of a world at war, a virtual search for identity, and the future of humanity. Five years ago, bioengineer Peter Bernhardt spearheaded an innovation in nanotechnology that changed the course of evolution. Until everything was taken from him--his research, the people he loved, and finally his life. Uploaded as an artificial intelligence, Peter is alive again thanks to a critical reactivation by fellow AI Carter Potsdam. But a third sentient computer program, Major Tom, is tearing the United States apart, destroying its leaders and its cities. Major Tom's mission: rebuild a new America from the ruins and reign as uncontested monarch. Carter knows that only a revolutionary like Peter can reverse the damage to a country set on fire. Caught in a virtual world between an alleged ally and an enemy, pieces of Peter's former self remain: the need for vengeance, empathy for the subjugated people of a derelict world, and doubt in everything

he's been led to believe. To rescue what's left, he'll need to once again advance the notion of evolution and to expand the meaning of being human--by saving humanity.

As the war between the Human Planetary Alliance and the Daklan intensifies, Captain Carl Recker experiences a sudden change in fortune. With battle-hardened officers in short supply, he's given command of a modified, shipyard-fresh destroyer and a mission to go with it. As part of a task force under the command of an officer Recker is unfortunately all-too-familiar with, the plan is to recover weapons and technology from an uncharted world on the edge of known space. Easy. Little does Recker know it, but the outcome of this mission may well determine the future of both humanity and the Daklan. The distant planet Pinvos will be the scene of conflict and destruction on a cataclysmic scale and even success will be tempered by the uncertainty of what he discovers. With each passing day, a faraway war fought on a colossal scale comes ever nearer and humanity has no defence against the weapons created to fight it. No defence except perhaps one thing. The alien warship Vengeance has survived countless engagements and still it endures, scarred by the brutality of its past. And Recker is the only man with the key to unlock its secrets. Fractured Horizons is a traditional-style science-fiction action adventure and the second
