Suitable as a training manual and a day-to-day reference, Shiphandling is the comprehensive and up to date guide to the theory and practice of ship handling procedures. It covers the requirements of all STCW-level marine qualifications, provides expert guidance on all the hardware that marine professionals will make use of in the control and operation of their vessel and offers a broad focus on many shiphandling scenarios. ? Covers all key shiphandling topics for nautical (merchant marine) students and more experienced mariners seeking trusted guidance ? Author David House is one of the best known marine authors; he has a wealth of experience, with over 30 years experience at sea and is author of 11 successful marine operations books ? Covers STCW requirements; is written for professional mariners, rather than amateur sailors; offers a highly practical professional development based approach to enhancing the reader's skills and knowledge, with a focus on preparing them for higher rank.

This guide has been written to help Christian leaders in their counseling work. Case studies are matched with biblical analyses. This then leads to a survey of causes, effects, counseling considerations, and suggested ways to prevent the problem.

During the last two decades, the (re-)discovery of thousands of manuscripts in different regions of sub-Saharan Africa has questioned the long-standing approach of Africa as a continent only characterized by orality and legitimately assigned to the continent the status of a civilization of written literacy. However, most of the existing studies mainly aim at serving literary and historical purposes, and focus only on the textual dimension of the manuscripts. This book advances on the contrary a holistic approach to the study of these manuscripts and gather contributions on the different dimensions of the manuscript, i.e. the materials, the technologies, the practices and the communities involved in the production, commercialization, circulation, preservation and consumption. The originality of this book is found in its methodological approach as well as its comparative geographic focus, presenting studies on a continental scale, including regions formerly neglected by existing scholarship, provides a unique opportunity to expand our still scanty knowledge of the different manuscript cultures that the African continent has developed and that often can still be considered as living traditions.

According to Webster's dictionary a crisis is a "decisive moment or an unstable or crucial time or state of affairs" in history. It is fashionable to suggest the early 21st century is a time of crisis. We are told by our leadership that crisis is on every hand. Indeed, when crisis does not materialize as quickly or as violently as one might expect, it seems civil leadership is not averse to creating "crisis." However, we are in the midst of crisis. The situation we face today is not

economic, environmental, political or sociological. Instead, it is a crisis of leadership at the most elementary level. It is a crisis requiring a dramatic cultural shift in order to correct the course of history. As things now stand we are headed for disaster. Indeed, we are experiencing the slow unfolding of disaster all around us even today.

In order to protect company's information assets such as sensitive customer records, health care records, etc., the security practitioner first needs to find out: what needs protected, what risks those assets are exposed to, what controls are in place to offset those risks, and where to focus attention for risk treatment. This is the true value and purpose of information security risk assessments. Effective risk assessments are meant to provide a defensible analysis of residual risk associated with your key assets so that risk treatment options can be explored. Information Security Risk Assessments gives you the tools and skills to get a quick, reliable, and thorough risk assessment for key stakeholders. Based on authors' experiences of real-world assessments, reports, and presentations Focuses on implementing a process, rather than theory, that allows you to derive a quick and valuable assessment Includes a companion web site with spreadsheets you can utilize to create and maintain the risk assessment

NEW YORK TIMES BESTSELLER • “Comprehensive, enlightening, and terrifyingly timely.”—The New York Times Book Review (Editors' Choice) WINNER OF THE GOLDSMITH BOOK PRIZE • SHORTLISTED FOR THE LIONEL GELBER PRIZE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • Time • Foreign Affairs • WBUR • Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for How Democracies Die “What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post “Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics.”—Ezra Klein, Vox “If you only read one book for the rest of the year,

read *How Democracies Die*. . . .This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest.”—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) “A smart and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal.”—Fareed Zakaria, CNN

Traumatic Affect examines the intersection of trauma theory and affect theory, two areas of crucial relevance to contemporary thought. While both fields continue to offer insights into individual and collective experience, exploring their nexus offers timely and necessary critiques of film, literature, art, culture and politics. This collection of essays by established and emerging thinkers considers the dynamic relations within and between affect and trauma. Varied in style and approach, this volume asks how the relational subject conceived by affect theory might bring into question certain presuppositions common to trauma theory and how the ethical imperatives of trauma might require a rethinking of aspects of affect theory. Thus the contributors reimagine the unrepresentability of trauma, reveal its affective economies, and chart innovative understandings of experiences, embodiments, and events. From the silence into which Walter Benjamin fell after the suicide of his closest friend to the trauma of becoming the emblematic media figure of the London bombings, *Traumatic Affect* traverses diverse terrain: gesture and the everyday, cinema and torture, art and writing, civility and specters, media representation and Indigenous Australian film. Featuring essays by Shoshana Felman, Karyn Ball, Jennifer L. Biddle, Anna Gibbs, Ben O’Loughlin, Anne Rutherford, Magdalena Zolkos, Aaron Kerner, Ricardo Mbarkho, Jonathan L. Knapp, Michael Richardson and Meera Atkinson, *Traumatic Affect* ventures into bold new territories at the juncture between trauma and affect, illuminating pressing realities that demand engagement.

Cyber Warfare Techniques, Tactics and Tools for Security Practitioners provides a comprehensive look at how and why digital warfare is waged. This book explores the participants, battlefields, and the tools and techniques used during today's digital conflicts. The concepts discussed will give students of information security a better idea of how cyber conflicts are carried out now, how they will change in the future, and how to detect and defend against espionage, hacktivism, insider threats and non-state actors such as organized criminals and terrorists. Every one of our systems is under attack from multiple vectors - our defenses must be ready all the time and our alert systems must detect the threats every time. This book provides concrete examples and real-world guidance on how to identify and defend a network against malicious attacks. It considers relevant technical and factual information from an insider's point of view, as well as the ethics, laws and consequences of cyber war and how computer criminal law may change as a result. Starting with a definition of cyber warfare, the book’s 15 chapters discuss the following topics: the cyberspace battlefield;

cyber doctrine; cyber warriors; logical, physical, and psychological weapons; computer network exploitation; computer network attack and defense; non-state actors in computer network operations; legal system impacts; ethics in cyber warfare; cyberspace challenges; and the future of cyber war. This book is a valuable resource to those involved in cyber warfare activities, including policymakers, penetration testers, security professionals, network and systems administrators, and college instructors. The information provided on cyber tactics and attacks can also be used to assist in developing improved and more efficient procedures and technical defenses. Managers will find the text useful in improving the overall risk management strategies for their organizations. Provides concrete examples and real-world guidance on how to identify and defend your network against malicious attacks Dives deeply into relevant technical and factual information from an insider's point of view Details the ethics, laws and consequences of cyber war and how computer criminal law may change as a result

"This book takes you through the collection gallery by gallery, illuminating the art and installations in each room"--From preface.

Milton in Translation demonstrates the breadth of John Milton's international reception, from the seventeenth century through today. New essays by an international roster of experts explore the translation of Milton's works into twenty-three languages, in essays that are grouped geographically and, by and large, chronologically.

Readable full-length narrative of the Third Macedonian War, which effectively made Rome an almost global power beyond compare.

Conditions of malnutrition, conflict, or a combination of both characterize many Arab countries, but this was not always so. As in much of the developing world, the immediate post-independence period represented an age of hope and relative prosperity. But imperialism did not sleep while these countries developed, and it soon intervened to destroy these post-independence achievements. The two principal defeats and losses of territory to Israel in 1967 and 1973, as well as the others that followed, left in their wake more than the destruction of assets and the loss of human lives: the Arab World lost its ideology of resistance. The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world's developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post-colonial histories of Egypt, Syria, and Iraq.

The Commercial Shipping Handbook is an invaluable reference tool for anyone involved in international trade and a first step towards understanding the framework within which the international movement of goods by sea is conducted. The handbook gives concise explanations of the many activities that comprise shipping, explaining the terms and how they interrelate. Areas covered include: Documents used in international transport by sea e.g. the bill of lading and the charter-

party – what they contain, the different types and examples of each Generic types of ships, cargoes, containers and ports Details of all the major maritime associations prominent in contract drafting and policy making, together with a brief explanation of their objectives The many extra costs and surcharges found in shipping, particularly in liner shipping Chartering terms, an explanation of each and their context Clauses appearing in bills of lading, in voyage charters and time charters Technical elements of shipping as they relate to the commercial operation of ships, for example tides and draughts Examples of principal documents Discussing over 1250 commercial shipping terms, this book will be an essential reference for all shipowners, charterers, managers and brokers and will also be of use to legal, insurance and banking professionals.

Jason Polan is on a mission to draw every person in New York, from cab drivers to celebrities. He draws people eating at Taco Bell, admiring paintings at the Museum of Modern Art, and sleeping on the subway. With a foreword by Kristen Wiig, *Every Person in New York, Volume 1* collects thousands of Polan's energetic drawings in one chunky book. As full as a phone book and as invigorating as a walk down a bustling New York street, this is a new kind of love letter to a beloved city and the people who live there.

The Earth's plant genetic resources are a common inheritance of all humankind, which should be held in shared trust for a common future. A key component of the global genetic commons is agricultural biodiversity. Our food and livelihood security depend on the sustained management of these diverse biological resources that are important for food and agriculture. Whilst agricultural biodiversity originates in specific farming communities, it has been shared widely and is considered by many to be part of the much-threatened global commons. This book is about the creation, management and use of the global crop commons. It focuses primarily on the legal and administrative construct that provides the basis of the global crop commons, that is, the multilateral system of access and benefit-sharing created by the International Treaty on Plant Genetic Resources for Food and Agriculture. This is particularly significant because it transcends the traditional dichotomy between privatization and total governmental control. It came into effect in 2006 and the book describes its origins and implementation since then, showing how many international organizations and some developing countries are moving quickly with implementation, while other countries are moving slowly and some multinational corporations are expressing misgivings about the system overall. The authors further analyze current challenges and how they might be resolved.

Der Japanische Biographische Index verzeichnet in drei Bänden die 86.800 im Japanischen Biographischen Archiv enthaltenen Persönlichkeiten und erschließt 127.000 biographische Einträge aus 77 Quellenwerken in 178 Bänden, erschienen zwischen 1646 und 1998.

The fourth edition of *Constitutional and Administrative Law: Text with Materials* provides a wealth of essential materials drawn from a wide range of sources and integrated with lively commentary. It enables students to gain a full understanding of public law by

explaining the context of its historical development and current political climate.

Upscaling, Training, Commoning features a lively account of the 10-year exploration by STEALTH.unlimited into what it means to engage with the glimpses of a world that has become conceivable in the cracks of the Global Financial Crisis (2008). Ultimately, this book is about devising methods for imagining and enacting other worlds. The perspective for this is situated between spatial practice and emerging commons, between an already plundered future and the politics of possibility, between reflection and future fiction. The book traces the moves STEALTH.unlimited (Ana Dzoki? and Marc Neelen) have taken to reframe practice, to rethink economy and create urban commons. Its six-part sequence moves from critique to commitment, but along the way reveals an unsettling systemic rejection - by current politics and economy - of the urgency to upscale and 'train' for a world beyond the capitalist urban condition. The book leads us thus to a crucial question: how to construct our alternatives on the ruins of the broken system? By including personal accounts from emerging alternative voices from literature, economy and urban politics from across Europe, it expands this quest beyond the field of architecture and art.

As the sophistication of cyber-attacks increases, understanding how to defend critical infrastructure systems—energy production, water, gas, and other vital systems—becomes more important, and heavily mandated. Industrial Network Security, Second Edition arms you with the knowledge you need to understand the vulnerabilities of these distributed supervisory and control systems. The book examines the unique protocols and applications that are the foundation of industrial control systems, and provides clear guidelines for their protection. This how-to guide gives you thorough understanding of the unique challenges facing critical infrastructures, new guidelines and security measures for critical infrastructure protection, knowledge of new and evolving security tools, and pointers on SCADA protocols and security implementation. All-new real-world examples of attacks against control systems, and more diagrams of systems Expanded coverage of protocols such as 61850, Ethernet/IP, CIP, ISA-99, and the evolution to IEC62443 Expanded coverage of Smart Grid security New coverage of signature-based detection, exploit-based vs. vulnerability-based detection, and signature reverse engineering

Combining insider and outsider perspectives, Women in Lebanon looks at Christian and Muslim women living together in a multicultural society and facing modernity. While the Arab Spring has begun to draw attention to issues of change, modernity, and women's subjectivity, this manuscript takes a unique approach to examining and describing the Lebanese "alternative modernities" thesis and how it has shaped thinking about the meaning of terms like evolution, progress, development, history, and politics in contemporary Arab thought. The author draws on extensive ethnographic research, as well as her own personal experience.

This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and

bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.

Volume 1 (A and B) of the Yearbook of International Organizations covers international organizations throughout the world, comprising their aims, activities and events

The 2009 global economic crisis has significantly impacted international tourism, causing a decline in international tourist arrivals and international tourism revenues. This study looks into the effects of the decrease in international tourism demand on the employment, income opportunities and the livelihood of poor and vulnerable groups, as well as on the capacity of households to cope with such shocks. The report combines a comparative large-N macro-economic analysis with case studies on the Maldives, Costa Rica and Tanzania.

750 Russian Verbs and Their Uses gives you the key to a living language - verbs in context. 750 Russian Verbs and Their Uses gives you all the correct variations and adds immediately to your command of the language. Correct usages are illustrated in common phrases and idioms, and close attention is paid to verb aspect - a special concern to students of Russian. Perfect for students or for businesspeople who are working to develop one of the world's most exciting commercial markets, here is the book that will help you understand and express yourself in an important and intricate tongue.

The Basics of Hacking and Penetration Testing, Second Edition, serves as an introduction to the steps required to complete a penetration test or perform an ethical hack from beginning to end. The book teaches students how to properly utilize and interpret the results of the modern-day hacking tools required to complete a penetration test. It provides a simple and clean explanation of how to effectively utilize these tools, along with a four-step methodology for conducting a penetration test or hack, thus equipping students with the know-how required to jump start their careers and gain a better understanding of offensive security. Each chapter contains hands-on examples and exercises that are designed to teach learners how to interpret results and utilize those results in later phases. Tool coverage includes: Backtrack Linux, Google reconnaissance, MetaGooFil, dig, Nmap, Nessus, Metasploit, Fast Track Autopwn, Netcat, and Hacker Defender rootkit. This is complemented by PowerPoint slides for use in class. This book is an ideal resource for security consultants, beginning InfoSec professionals, and students. Each chapter contains hands-on examples and exercises that are designed to teach you how to interpret the results and utilize those results in later phases. Written by an author who works in the field as a Penetration Tester and who teaches Offensive Security, Penetration Testing, and Ethical Hacking, and Exploitation classes at Dakota State University. Utilizes the Kali Linux distribution and focuses on the seminal tools required to complete a penetration test.

Upon the death of Saladin in 1193, his vast empire, stretching from the Yemen to the upper reaches of the Tigris, fell into the hands of his Ayyubid kinsmen. These latter parceled his domains into a number of autonomous principalities, though some common identity was maintained by linking these petty states into a loose confederation, in which each local prince owed allegiance to the senior member of the Ayyubid house. Such an arrangement was, of course, highly unstable, and at first glance Ayyubid history appears to be no more than a succession of unedifying squabbles among countless rival princelings, until at last the family's hegemony was extinguished by two events: 1) a coup d'état staged by the palace guard in Egypt in 1250, and 2) the Mongol occupation of Syria, brief but destructive, in 1260. But appearances to the contrary, the obscure quarrels of Saladin's heirs embodied a political revolution of highest importance in Syro-Egyptian history. The seven decades of Ayyubid rule mark the slow and sometimes violent emergence of a new administrative relationship between Egypt and Syria, one in which Syria was subjected to close centralized control from Cairo for the unprecedented period of 250 years. These years saw also the gradual decay of a form of government--the family confederation--which had been the most characteristic political structure of Western Iran and the Fertile Crescent for three centuries, and its replacement by a unitary autocracy. Finally, it was under the Ayyubids that the army ceased to be an arm of the state and became, in effect, the state itself. When these internal developments are seen in the broader context of world history as it affected Syria during the first half of the thirteenth century--Italian commercial expansion, the Crusades of Frederick II and St. Louis, the Mongol expansion--then the great intrinsic interest of Ayyubid history becomes apparent. Professor Humphreys has developed these themes through close examination of the political fortunes of the Ayyubid princes of Damascus. For Damascus, though seldom the capital of the Ayyubid confederation, was, nevertheless, its hinge. The struggle for regional autonomy vs. centralization, for Syrian independence vs. Egyptian domination, was fought out at Damascus, and the city was compelled to stand no less than eleven sieges during the sixty-seven years of Ayyubid rule. Almost every political process of real significance either originated with the rulers of Damascus or was closely reflected in their policy and behavior. The book is cast in the form of a narrative, describing a structure of politics which was in no way fixed and static, but dynamic and constantly evolving. Indeed, the book does not so much concern the doings of a group of rather obscure princes as it does the values and attitudes which underlay and shaped their behavior. The point of the narrative is precisely to show what these values were, how they were expressed in real life, and how they changed into quite new values in the course of time.

Since the 1970s the cognitive sciences have offered multidisciplinary ways of understanding the mind and cognition. The MIT Encyclopedia of the Cognitive Sciences (MITECS) is a landmark, comprehensive reference work that represents the methodological and theoretical diversity of this changing field. At the core of the encyclopedia are 471 concise entries,

from Acquisition and Adaptationism to Wundt and X-bar Theory. Each article, written by a leading researcher in the field, provides an accessible introduction to an important concept in the cognitive sciences, as well as references or further readings. Six extended essays, which collectively serve as a roadmap to the articles, provide overviews of each of six major areas of cognitive science: Philosophy; Psychology; Neurosciences; Computational Intelligence; Linguistics and Language; and Culture, Cognition, and Evolution. For both students and researchers, MITECS will be an indispensable guide to the current state of the cognitive sciences.

The second installment of Phyllis Ma's "Mushrooms & Friends" continues the phantasmagoric photography of foraged and cultivated mushrooms. Familiar gilled mushrooms are included in addition to spongy, stalkless and club-like fungi. The collection is then juxtaposed with visceral props - sliced orange powdered with tumeric, purple daisies on green sugar, veiny texture of a cabbage leaf - and transformed into otherworldly, Dr. Seussian assemblages.

Using the factor analysis of information risk (FAIR) methodology developed over ten years and adopted by corporations worldwide, Measuring and Managing Information Risk provides a proven and credible framework for understanding, measuring, and analyzing information risk of any size or complexity. Intended for organizations that need to either build a risk management program from the ground up or strengthen an existing one, this book provides a unique and fresh perspective on how to do a basic quantitative risk analysis. Covering such key areas as risk theory, risk calculation, scenario modeling, and communicating risk within the organization, Measuring and Managing Information Risk helps managers make better business decisions by understanding their organizational risk. Uses factor analysis of

information risk (FAIR) as a methodology for measuring and managing risk in any organization. Carefully balances theory with practical applicability and relevant stories of successful implementation. Includes examples from a wide variety of businesses and situations presented in an accessible writing style.

Abe, Son of Abraham begins as a series of well written and funny vignettes about the author's early years and his special relationship with his father. It concludes with remembrances of his uncles and aunts, immigrants from Lebanon. In between are stories of adventures of hitchhiking in Europe, serving in the Army in the Far East and traveling in the Middle East. The title derives from the fact that Abe and Abraham are Junior and Senior, leading to the book's dedication to the father whose influence permeated the life of the junior. Abe J. Bassett is Emeritus Professor of Theatre Arts at Wright State University, and former Dean of the School of Fine and Performing Arts at Indiana University Purdue University Fort Wayne. He writes about his academic career and how his Theatre Arts department became the most outstanding undergraduate program in Ohio. Earlier he edited and published Memories of Rahija, stories of his mother. Altogether in 296 pages there are 55 entries in ten sections.
