context. The OPD English/Chinese, along with the monolingual workbooks and many other components, can be used as a reference book or as text for high school or adult ESL students at the beginner level. For years, the first monolingual Canadian edition of the OPD has been the industry leader among picture dictionaries. The second edition expands on the topics covered, providing more depth of vocabulary in the areas that matter most to students and offers Chinese speakers the additional advantage of having words and phrases defined in their native language. The illustrations have been completely updated in a more realistic style that is visually appealing to adult learners. The second edition also contains two new features: Introductory Pages and Story Pages. The Introductory Pages have been added to the beginning of each theme to give lower-level students a basic overview of key vocabulary words, and to give a starting point for discussion and an introduction to the theme for more advanced students. The Story Pages consist of a two-page spread at the end of each theme to help students use the words in context and practise their reading skills. The OPD English/Chinese is designed for use both in and out of the classroom. Speaking exercises are presented throughout the OPD to allow students to practise new vocabulary in pairs or small groups, while the pronunciation guide in the index allows students to check their pronunciation when they are studying on their own.

This is the first systematic study of modern China's military campaigns and the actual fighting conducted by the People's Liberation Army since the founding of the People's Republic. It provides a general overview of the evolution of PLA military doctrine, and then focuses on major combat episodes from the civil war with the Nationalists to the last significant combat in Vietnam in 1979, in addition to navy and air operations through 1999. In contrast to the many works on the specifics and hardware of China's military modernization, this book discusses such topics as military planning, command, and control; fighting and politics; combat tactics and performance; technological catch-up and doctrinal flexibility; the role of Mao Zedong; scale and typologies of fighting; and deterrence. The contributors include scholars from Mainland China, Taiwan, and the United States, who draw from a wealth of fresh archival sources.
