

Planet Earth My Infographic Sticker Activity Book

Journey from Earth to the outer reaches of the universe with this stunning book about space! You'll encounter bizarre planets, distant stars, and intricate galaxies. From planets and asteroids to black holes and galaxies, every page of this captivating book reveals the secrets behind more than 100 celestial objects. Get ready to explore fun facts and exciting new scientific discoveries! For centuries, the mysteries of space have captured our imaginations. This picture book will illuminate imaginations and spark curious minds to explore the vastness of space. Take your little astronaut on a journey from our planet out into the furthest reaches of the universe! Filled with gorgeous illustrations and incredible photography, young readers will be intrigued by the detailed close-up images of each celestial body. The engaging storybook-style descriptions and simple text shed a light on facts, myths, and key discoveries about the universe. Explore the wonders of our solar system and beyond. This educational book also includes reference pages packed with fascinating information. Journey Through the Vastness of Space Join us on an adventure across the universe, as we rocket to the stars! Discover 100 objects from the universe, arranged from the closest to our planet to the ones the furthest away. Storybook-style text and out-of-this-world pictures make this book perfect for an astronomical bedtime. It's also a fantastic gift for children who can't get enough of space. Grab your spacesuit and put your helmet on! Inside the pages of this adventure book, you'll find: - Beautiful illustrations and incredible photography that showcase the mysteries of space. - Discover 100 remarkable objects in the cosmos. - Engaging storybook-style descriptions that explain key discoveries about the universe. More to Explore Once you've discovered The Mysteries of the Universe, dive into the companion titles from this series from DK Books! The Wonders of Nature explores more than 100 items from the natural world and An Anthology of Intriguing Animals showcases animals around the world.

What is the most popular pet in the world? Where is the hottest place on Earth? When was the first country formed? Learn these and dozens of other fascinating facts about the planet and its people with this dynamically-illustrated and informative guide, with 48 colourful pages packed to the brim with graphs and charts about the world in which we live. Topics covered in the book include: The Earth's distance from the sun Record-breaking weather Largest and smallest countries Awesome animals World religions The World Wide Web Planets in motion And much, much more. With out-of-this-world illustrations by Gwen Keraval and intriguing facts compiled by Eliza Berkowitz, this is an enjoyable learning resource for both adults and kids alike. About Lonely Planet Kids: Lonely Planet Kids - an imprint of the world's leading travel authority Lonely Planet - published its first book in 2011. Over the past 45 years, Lonely Planet has grown a dedicated global community of travellers, many of whom are now sharing a passion for exploration with their children. Lonely Planet Kids educates and encourages young readers at home and in school to learn about the world with engaging books on culture, sociology, geography, nature, history, space and more. We want to inspire the next generation of global citizens and help kids and their parents to approach life in a way that makes every day an adventure. Come explore!

Absorbing facts about the 11.3 million species on Earth might cause your brain to burst! You need to take in huge timelines (the first life on Earth formed 3.8 billion years ago), huge numbers (your body is made up of trillions of cells), and even huger mysteries (why species go extinct). How can all these big numbers and concepts make more sense? Infographics! The charts, maps, and illustrations in this book tell a visual story to help you better understand key concepts about life science. Crack open this book to explore mind-boggling questions such as: ? How do organisms evolve over millions of years? ? How does DNA determine what you will look like? ? Why are so many species struggling to survive today? The answers are sure to be life-expanding!

Caldecott Honor winner Steve Jenkins introduces By the Numbers infographic readers chock full of incredible infographs and stunning, full-color cut-paper illustrations. Earth will focus on the fascinating ins-and-outs of earth science. Through infographics, illustrations, facts, and figures, readers will learn about the complex and wonderful place we call home, Earth. Discover some of the most fascinating aspects of our planet through astonishing numbers: the stretch of time from Earth's formation to the present, the misleading way the surface area of a continent can appear on a map, the angle of Earth's axis that creates the seasons, what percentage of Earth's land is covered in deserts or forests or cities, and so much more. With his signature style, Steve Jenkins explores the most fascinating fields of natural science.

"A fresh, new approach to anatomy and science about the human body. Pictorial info-graphics style illustrations provide easily digestible facts in bite-size chunks."

"In order to survive, all living things on Earth must adapt to their environment. They all have certain senses that help them hunt for prey or ways they protect themselves. It's impossible to learn all of it, but through the infographics in this book, readers are sure to understand a great deal. With colorful diagrams and succinct text, each chapter covers a different facet of life on Earth, including how plants protect themselves, cold adaptations, and the carbon cycle. ""Try This"" boxes throughout the book engage readers by suggesting activities and asking questions related to the text."

Astronomers are discovering more and more information about space, making the subject a very hot topic in schools and out of it. This guide is full of genuine facts, answering all our space-related questions and prompting more along the way. Aimed at children aged nine and over, the pictorial info-graphics style illustrations provide easily digestible facts in bite-size chunks.

Artist James Gulliver Hancock depicts historical icons in quirky annotated portraits surrounded by their associated possessions, baggage, and foibles. Hemingway's hobbies, Amelia Earhart's preferred dessert, Martin Luther King Jr.'s favorite TV show. Each portrait reveals the ordinary quirks of these extraordinary people and captures their

personalities in the process.

Kids around the world are working together to make our planet a better, safer, happier place—and now you can join in with this practical guide! You Can Change the World empowers kids to make changes in their lives and communities with the powerful message that anyone can make a difference in the world. This colorfully illustrated book is packed with information, ideas, and activities for everyday sustainability—like mending clothes, composting, and avoiding single-use plastics. Interspersed throughout are features on children around the globe who are making a difference, such as Greta Thunberg or Solli Raphael, reminding kids that ordinary people can spark extraordinary change.

50 Maps of the World is an essential addition to the bookshelf of any young travel lover, map maestro, or geography genius. Spanning the world from Spain to Singapore, Colombia to Canada, Turkey to Tanzania, discover all you need to know about some of the most awesome places on Earth. Geography, history, and culture spill from the pages in this luxuriously illustrated treasure trove of travel knowledge. Each two-page spread is dedicated to a different country, providing both quick-fire facts and the chance to delve deeper into what makes every nation unique.

Natural wonders, bustling metropolises, storied pasts, and cultural icons are all presented in expert detail by a pair of experienced explorers. Meet our earliest ancestors in Ethiopia, marvel at Machu Picchu in Peru, and visit the floating villages of Cambodia in this colorful guide to 50 fascinating countries. Each spread includes dozens of spotlighted locations, a timeline of the nation's history, and introductions to the people who have helped shape it. With the expertise of Ben Handicott (Hello Atlas, Atlas of Adventures: Wonders of the World) and Kalya Ryan, alongside the stunning illustrations of Sol Linero (The 50 States, 50 Cities of the U.S.A.), experience the diversity of our world like never before. 50 Maps of the World reimagines what maps can be, providing not just a geographical fact fest but a vivid insight into the history, culture, and wildlife that shape our living world. It is the perfect gift for young globetrotters and armchair travelers alike. Also available from the 50 States series: The 50 States, The 50 States: Activity Book, The 50 States: Fun Facts, 50 Cities of the U.S.A., 50 Trailblazers of the 50 States, and I Spy the 50 States.

Engineering is what brings machines to life. Little learners can discover more about engineering at home by reading the simple explanations and doing the beautifully illustrated activities on each page. Start a lifelong passion for STEM subjects and inspire children to, one day, contribute an invention of their own to the world.

"All the world's a stage", William Shakespeare wrote, "And all the men and women merely players." Sit back as the curtain goes up on the dramas, sonnets, and life of one of the greatest writers in the English language. Shakespeare wrote or contributed to more than 40 plays, ranging from romantic comedies to the profound tragedy King Lear, as well as 154 sonnets. The Shakespeare Book has visual plot summaries of each one, with diagrams to show the intricate web of relationships in plays such as A Midsummer's Night Dream. Commentaries explain Shakespeare's sources and set each drama in context, revealing, for instance, how the warring Protestants and Catholics of his day are mirrored in Romeo and Juliet's Montagues and Capulets. Written in plain English and packed with graphics and illustrations, The Shakespeare Book illumines the Bard's world - his marriage, businesses, and friends - and explains how his works became an enduring phenomenon. Whether you need a guide through complex plots and unfamiliar language, or you're looking for a fresh perspective on his well-loved plays and sonnets, this indispensable guide will help you fully appreciate Shakespeare, the man, and the writer. Reviews: "Generous helpings of illustrations, time lines, plot diagrams, and character guides ensure that even readers in their 'salad days' will enjoy every dish at the Shakespearean feast." - Booklist "Enlightening" - YA Book Central "In this latest addition to the series, the Bard comes alive for young aficionados." - School Library Journal "Countless volumes have been written about William Shakespeare and his work, but here is a single volume that has organized his plays (and some of his sonnets) in exactly what the subtitle says: 'Big Ideas Simply Explained...a must-have.'" - VOYA magazine

Vincent is ready to paint his house—but what color should it be? He starts painting it white, but the spider says it's his house, and he likes red. The caterpillar says it's his house and he likes yellow. The beetle likes purple, and the bird likes blue. Each color introduces a new variety of vibrant shades, filling Vincent's palette with too many options. But, creative genius that he is, Vincent finds a way to make everyone happy! Blending his signature cartoonish style with the textures and color choices of a certain post-impressionist Vincent, Tedd Arnold has created a simple story about friendship and compromise which is also a quiet, charming introduction to one of the most famous painters of history.

Finally, Lonely Planet has made the Atlas kids have been waiting for! With 160 pages of illustrated maps, engaging infographics, mind-blowing photography and a large dose of humour, this is the atlas that shows kids aged 8 and up what the world is really like.

An illustrated tour of the planet exploring ecosystems large and small, from reefs, deserts, and rainforests to a single drop of water—from the New York Times bestselling author of Women in Science. Making earth science accessible and entertaining through art, maps, and infographics, The Wondrous Workings of Planet Earth explains how our planet works—and how we can protect it—from its diverse ecosystems and their inhabitants, to the levels of ecology, the importance of biodiversity, the cycles of nature, and more. Science- and nature-loving readers of all ages will delight in this utterly charming guide to our amazing home.

My Human Body Infographic Sticker Activity Book is an interactive journey around your amazing body. Includes more than 200 stickers and printed on high-quality paper that's perfect to color in with felt-tips or crayons. This book is ideal for long journeys, rainy days and a great gift for curious children. Includes over 200 stickers and printed on high-quality paper that's perfect to color in with felt-tips or crayons, this book is ideal for long journeys, rainy days and a great gift for curious children.

"An indispensable guide for anyone who wants to live to age 100—by making sure there's a livable world when you get there." —Dan Buettner, New York Times—bestselling author of The Blue Zones Do you consider yourself an environmental ally? Maybe you recycle your household goods, ride a bike, and avoid too much air travel. But did you know that the primary driver of climate change isn't plastics, or cars, or airplanes? Did you know that it's actually our industrialized food system? In this fascinating new book, authors Nil Zacharias and Gene Stone share new research, intriguing infographics, and compelling arguments that support what scientists across the world are beginning to affirm and uphold: By making even minimal dietary changes, anyone

can have a positive, lasting impact on our planet. If you love the planet, the only way to save it is by switching out meat for plant-based meals, one bite at a time. “This fascinating, easy-to-read book will give you still another reason to eat plants and not animals: you will be doing a world of good—literally!” —Rip Esselstyn, #1 New York Times–bestselling author of Plant-Strong “Eating plants is not just good for your own health, it’s imperative for the health of the planet. This well-argued, well-written book makes it clear why everyone should consider a plant-based diet today.” —Michael Greger, MD, New York Times–bestselling author of How Not to Die “Possibly the single most important environmental book I’ve read in years. A must for everyone.” —Kathy Freston, New York Times–bestselling author of The Lean

Packed with fact-based stickering, coloring and searching activities to help you remember all of the fascinating facts, My Space Infographic Sticker Activity Book is a bold, bright and beautiful book that will take your imagination on an exciting journey.

Considered by many the greatest war novel of all time, *All Quiet on the Western Front* is Erich Maria Remarque's masterpiece of the German experience during World War I. I am young, I am twenty years old; yet I know nothing of life but despair, death, fear, and fatuous superficiality cast over an abyss of sorrow. . . . This is the testament of Paul Bäumer, who enlists with his classmates in the German army during World War I. They become soldiers with youthful enthusiasm. But the world of duty, culture, and progress they had been taught breaks in pieces under the first bombardment in the trenches. Through years of vivid horror, Paul holds fast to a single vow: to fight against the principle of hate that meaninglessly pits young men of the same generation but different uniforms against one another . . . if only he can come out of the war alive. “The world has a great writer in Erich Maria Remarque. He is a craftsman of unquestionably first rank, a man who can bend language to his will. Whether he writes of men or of inanimate nature, his touch is sensitive, firm, and sure.”—The New York Times Book Review

An exciting interactive title chock-full of stars, planets, aliens, and everything out of this world brings National Geographic Kids signature content to a sticker and activity book format. For kids who love our universe, this book features the coolest science kids can't get enough of: our planet Earth, cool asteroids, fun aliens, comets, and so much more.
