Interest in the role of extracellular vesicles (microvesicles and exosomes) is expanding rapidly. It is now apparent that far from being merely cellular debris, these vesicles play a key role in cell-to-cell communication and signaling. Moreover, they are significantly elevated in a number of diseases. This raises the question of their direct role in pathogenesis as well as their possible use as biomarkers. This book stems from the first international meeting on "Microvesicles and Nanovesicles in Health and Disease" held at Magdalen College, Oxford, in 2010. The purpose of the meeting was to bring together, for the first time, a range of experts from around the world to discuss the latest advances in this field. Key to the study of these vesicles is the availability of methodologies for their measurement in biological fluids. A major section of the meeting focused on a range of exciting new technologies which have been developed for this purpose. The presentations at this meeting form the basis of this book, which will appeal to basic scientists, clinicians, and those developing technology for the measurement of extracellular vesicles.

This guide to the language differences between the United States and United Kingdom is "a fascinating collection full of all kinds of surprises" (Minneapolis Star Tribune). Taxi rank . . . toad in the hole . . . dustman . . . fancy dress . . . American visitors to London (or viewers of British TV shows) might be confused by these terms. But most Britons would be equally puzzled by words like caboose, bleachers, and busboy. In *Divided by a Common Language*, Christopher Davies explains these expressions and discusses the many differences in pronunciation, spelling, and vocabulary between British and American English. He compares the customs, manners, and practical details of daily life in the United Kingdom and the United States, and American readers will enjoy his account of American culture as seen through an Englishman's eyes. Davies tops it off with an amusing list of expressions that sound innocent enough in one country but make quite the opposite impression in the other. Two large glossaries help travelers translate from one variety of English to the other, and additional lists explain the distinctive words of Australia, New Zealand, and South Africa. This delightful book is the ideal companion for travelers—or anyone who enjoys the many nuances of language.

Using a content-based, student-centered approach, Mundo 21 emphasizes communication, pair and group work, learning in context, and critical-thinking skills. Except for the grammar explanations, the text is written entirely in Spanish, exposing students on a consistent basis to natural language. Offering a grammar manual written entirely in Spanish, Mundo 21, Edición alternativa, is suitable for heritage learner courses as well as for courses conducted in Spanish. Intended to broaden students' cultural competency, Mundo 21, 2/e, is organized around eight geographically oriented units covering the world's 21 Spanish-speaking countries and diverse Hispanic populations. In addition, each lesson (three per unit) contains a cultural vignette followed by a short exercise. Vivid photographs of people, places, and art work illustrate each lesson to enrich students' experience with Hispanic culture. Images accompanying each Lectura provide important clues and context to heighten comprehension. The Gente del Mundo 21 section at the beginning of the lessons profiles three noteworthy personalities in the arts, literature, sports, and the entertainment industry of the country featured. Each Del pasado al presente reading provides a brief historical and cultural overview of the country under study, accompanied by an A ver si comprendiste! activity. Each unit contains a literary reading in Y ahora, a leer!, accompanied by an extensive pre-reading apparatus, Anticipando la lectura; post-reading support, Comprendiste la lectura? which checks comprehension and encourages analysis and discussion; a new feature, Introduccion al analisis literario; and an additional creativewriting activity. Cultura en vivo sections provide a cultural context for the thematic, interactive vocabulary sections, Mejoremos la comunicacion. A conversar! sections reinforce the new vocabulary through pair and group activities. Palabras claves sections focus on a key word from the Cultura en vivo reading and prompt student interaction with the vocabulary. Escribamos ahora sections, appearing at the end of Lesson 2 in each unit, provide an innovative process approach to developing writing skills and organizational techniques that helps students produce a well-developed composition. An end-of-text Manual de gramatica, cross-referenced to the text and designed for independent study, offers review and practice of the grammatical structures in meaningful contexts. Supported by Luz! Camara! Accion! sections in the text, the 60-minute Mundo 21 Video offers authentic footage, documentaries, travelogues, music, and other cultural features from various regions of the Hispanic world. Exploremos el ciberespacio sections at the end of each lesson direct students to the Mundo 21 Web Site, which features web-search activities, auto-correcting self-tests, and a resources section for additional research.

Viruses in the Parvoviridae family constitute one of the most diverse and intriguing fields of research. While they all share an ssDNA genome and a small capsid, they can differ widely in structure, genome organization and expression, virus-cell interaction, and impact on the host. Exploring such diversity and unraveling the inherent complexity in these apparently simple viruses is an ongoing endeavor and commitment for the scientific community. The translational implications of research on parvoviruses are relevant. Within the family, some viruses are important human and veterinary pathogens, in need of diagnostic methods and antiviral strategies; other viruses have long been studied and engineered as tools for oncolytic therapy, or as sophisticated gene delivery vectors, and can now display their wide and expanding applicative potential. This Special Issue of Viruses collects recent contributions in the field of parvovirus research, with a focus on new insights and research on unresolved issues, as well as new approaches exploiting systemic methodologies. Evolution, structural biology, viral replication, virus-host interaction, pathogenesis and immunity, and viral oncotherapy are a selection of the topics addressed in the issue that can be of relevance to the community involved in parvovirus research and of interest to a wider audience.

In the past, determination of bone maturity relied on visual evaluation of skeletal development in the hand and wrist, most commonly using the Greulich and Pyle atlas. The Gilsanz and Ratib digital atlas takes advantage of digital imaging and provides a more effective and objective approach to assessment of skeletal maturity. The atlas integrates the key morphological features of ossification in the bones of the hand and wrist and provides idealized, sex- and age-specific images of skeletal development. New to this revised second edition is a description and user manual for Bone Age for iPad®, iPhone® and iPod touch®, which can be purchased and used separately from this book. The App can be easily employed to calculate the deviation of the

patient's age from the normal range and to predict a possible growth delay. This easy-to-use atlas and the related App will be invaluable for radiologists, endocrinologists, and pediatricians and also relevant to forensic physicians.

Oman is the inheritor of a unique political tradition, the imama (imamate), and has a special place in the Arab Islamic world. From the eighth century and for more than a thousand years, the story of Oman was essentially a story of an original, minority, movement: the Ibadi. This long period was marked by the search for a just imama through the Ibadi model of the Islamic State. Hussein Ghubash's well-researched book takes the reader on an historical voyage through geography, politics, and culture of the region, from the sixteenth century to the present day. Oman has long-standing ties with East Africa as well as Europe; the first contact between Oman and European imperialist powers took place at the dawn of the 1500s with the arrival of the Portuguese, eventually followed by the Dutch, French and British. Persuasive, thorough and drawing on Western as well as Islamic political theory, this book analyzes the different historical and geopolitical roles of this strategic country. Thanks to its millennial tradition, Oman enjoys a solid national culture and a stable socio-political situation. Today, it is moving steadily towards a democratic future.

This book presents the complete formulation of a new advanced discretization meshless technique: the Natural Neighbour Radial Point Interpolation Method (NNRPIM). In addition, two of the most popular meshless methods, the EFGM and the RPIM, are fully presented. Being a truly meshless method, the major advantages of the NNRPIM over the FEM and other meshless methods, are the remeshing flexibility and the higher accuracy of the obtained variable field. Using the natural neighbour concept, the NNRPIM permits to determine organically the influence-domain, resembling the cellulae natural behaviour. This innovation permits the analysis of convex boundaries and extremely irregular meshes, which is an advantage in the biomechanical analysis, with no extra computational effort associated. This volume shows how to extend the NNRPIM to the bone tissue remodelling analysis, expecting to contribute with new numerical tools and strategies in order to permit a more efficient numerical biomechanical analysis.
