This volume represents the first comprehensive revision of Scottish child care law since 1968, when the Social Work (Scotland) Act was passed. The Act's new terminology and concepts - including parental responsibilities, children's rights, and children in need - have the potential to provide the impetus for substantial changes in practice and to influence more positive attitudes towards children. It brings together different areas of law affecting children and attempts to rationalize and co-ordinate them, inducing basic principles across all aspects.

This information document provides details of the Parental Responsibilities and Parental Rights Agreement, a legal document showing that a mother who has parental responsibilities has agreed with the child's father that he should also have parental responsibilities and rights.

1995 and the Children and Young People (Scotland) Act 2014 Preserves in accessible form many long-forgotten legal and social aims, cases and secondary legislation Kenneth Norrie traces the assumptions that underlay child protection law at particular periods of time and identifies the pressures for change - giving a clearer understanding of how and why the contemporary law is designed and operates as it does. Particular issues are traced in legislative detail, including court processes, the changing thresholds for state intervention, the increasing regulation of children's homes and foster care, the developing rules on corporal punishment and the earlier practice of compulsory emigration to the colonies of children removed from their parents. The transformation of adoption is also covered in comprehensive detail. In drawing out key themes and common threads, Norrie sets contemporary developments against their historical context and offers a fuller understanding of child protection law in Scotland.
